Visit IC Markets Website

IC Markets, founded in 2007 and based in Sydney, is the first Australian forex trading broker, and one of the biggest in the world. They have also been booming in recent years. IC Markets is **renowned for its cutting-edge ECN technology**, a factor that has enabled it to become one of the best brokers in terms of spread. For this reason, IC Markets is often the **first choice of scalpers and day traders**, i.e. traders with a high volume of daily operations.

Added to this attraction is the fact that IC Markets are very well-regulated by ASIC and CySEC, two of the most recognized regulatory bodies in the forex trading industry. They also boast some of the very lowest spreads for forex traders. This means that the **spreads start from 0 pips** on trading in many major markets. IC Markets also offer **lightening fast order execution** which has them widely considered as one of the best brokers for forex trading.

1. Open your MetaTrader 4
2. Click **File — Open Data Folder** (Picture #1)

Here you will find a folder called **MQL4**:

Pic.2 MQL4 Folder

3. Open **MQL4** folder. Now, you'll see these folders:

How to install Indicators, Experts, Scripts, Templates in MT4

\Experts – Expert Advisors (trading robots),
\Indicators – custom indicators,
\Scripts – scripts (MQL4 applications for a single run on the chart),
\Include – source code MQH and MQ4 files implemented into other programs,
\Libraries – libraries in the form of MQ4 source codes and EX4 executable files compiled from them.
They are used for the dynamic call of the functions contained there by other MQL4 programs,
\Images – image files for using in resources,
\Files – special “file sandbox”. MQL4 applications are allowed to execute file operations only within this directory.

Pic.3 Folders into MQL

4. Insert your files :

- Insert your EA files (ex4 or .mq4) into MQL4/Experts folder.
- Insert your Indicators (ex4 or .mq4) files into MQL4/Indicators folder.
- Insert your Scripts files (ex4 or .mq4) into MQL4/Scripts folder.
- Insert Settings files of EA (.set) into MQL4/Presets folder.
- Insert your Libraries files (dll) files into MQL4/Libraries folder.

– NOTE: Template files must be NOT in “MQL4 folder” . Copy your .tpl files into templates folder (Picture #4). You can find templates folder when open your Data Folder)
